

## QEEG Clinical Report

BrainLens V0.4

### Report Description

### Personal & Clinical Data

|                     |                     |                    |                              |
|---------------------|---------------------|--------------------|------------------------------|
| Name                | Abolfazl Firouzfard | Date of Recording  | 02-Feb-2025                  |
| Date of Birth - Age | 27-Nov-2013 - 11.18 | Gender             | Male                         |
| Handedness(R/L)     | Left                | Source of Referral | Asayesh Psychiatric Clinic - |
| Initial Diagnosis   | ADHD                |                    |                              |
| Current Medication  | -                   |                    |                              |

Asayesh Psychiatric Clinic -  
Dr Torabi

## Z Score Summary Information (EC)

## Z Score Summary Information (EO)

## E.C.T/B Ratio ( Raw- Z Score)

## E.O.T/B Ratio ( Raw- Z Score)

## Arousal Level

## APF(EO)

Frontal APF= 08.75

Posterior APF= 09.12

## APF(EC)

Frontal APF= 08.75

Posterior APF= 08.75

## EEG Spectra

## Alpha Asymmetry(AA)

## Alpha Blocking

## QEEG based predicting medication response

## Explanation

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmacoe EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com .

## Medication Recommendation

These two charts, calculate response probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.

## Pathological assessment for ADHD

### Compare to ADHD Database

### EEG Compatibility with ADHD Diagnosis

### Arousal Level Detection

### ADHD Clustering \*

1. Same inattentive and hyperactive prevalence. Well respond to stimulants.

\* If there is Paroxymal epileptic discharge in EEG data, this case needs sufficient sleep and should avoid high carbohydrate intake.  
You can consider anticonvulant medications.

## Denoising Information (EC)

Raw EEG

Denoised EEG

Flat Channels

Rejected Channels

| Number of Eye and Muscle Elements |   |        |   | Low Artifact Percentage        |            |
|-----------------------------------|---|--------|---|--------------------------------|------------|
| Eye                               | 3 | Muscle | 2 |                                |            |
| Total Artifact Percentage         |   |        |   | High Artifact Percentage       |            |
|                                   |   |        |   |                                |            |
| EEG Quality                       |   | good   |   | Total Recording Time Remaining | 224.72 sec |

## Denoising Information (EO)

Raw EEG

Denoised EEG

Flat Channels

Rejected Channels

| Number of Eye and Muscle Elements |   |        |   | Low Artifact Percentage        |            |
|-----------------------------------|---|--------|---|--------------------------------|------------|
| Eye                               | 4 | Muscle | 0 |                                |            |
| Total Artifact Percentage         |   |        |   | High Artifact Percentage       |            |
|                                   |   |        |   |                                |            |
| EEG Quality                       |   | good   |   | Total Recording Time Remaining | 260.58 sec |

## Absolute Power-Eye Closed (EC)

## Relative Power-Eye Closed (EC)

## Absolute Power-Eye Open (EO)

## Relative Power-Eye Open (EO)

# Summary Report

## EEG Quality

## Z-score Information

## Compatibility with ADHD

## Arousal Level

## APF

Posterior APF-EC= 08.75

Posterior APF-EO= 09.12
