

QEEG Clinical Report

BrainLens V0.4

Report Description

Personal & Clinical Data

Name	Meraj Keshavarz	Date of Recording	19-Feb-2025
Date of Birth - Age	10-Sep-2011 - 13.44	Gender	Male
Handedness(R/L)	Left	Source of Referral	Asayesh Psychiatric Clinic -
Initial Diagnosis	ADHD-Gaimer		
Current Medication	-		

Asayesh Psychiatric Clinic -
Dr Torabi

Z Score Summary Information (EC)

Z Score Summary Information (EO)

E.C.T/B Ratio (Raw- Z Score)

E.O.T/B Ratio (Raw- Z Score)

Arousal Level

APF(EO)

Frontal APF= 10.58

Posterior APF= 10.75

APF(EC)

Frontal APF= 10.00

Posterior APF= 10.50

EEG Spectra

Alpha Asymmetry(AA)

Alpha Blocking

QEEG based predicting medication response

Explanation

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmacoe EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com .

Medication Recommendation

These two charts, calculate response probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.

Pathological assessment for ADHD

Compare to ADHD Database

EEG Compatibility with ADHD Diagnosis

Arousal Level Detection

ADHD Clustering *

1. Same inattentive and hyperactive prevalence, may be anxious, may be highly intelligent, need sufficient sleep, and should avoid high carbohydrate intake. Consider clonidine

* If there is Paroxymal epileptic discharge in EEG data, this case needs sufficient sleep and should avoid high carbohydrate intake. You can consider anticonvulant medications.

Denoising Information (EC)

Raw EEG

Denoised EEG

Flat Channels

Rejected Channels

Number of Eye and Muscle Elements				Low Artifact Percentage	
Eye	3	Muscle	3		
Total Artifact Percentage				High Artifact Percentage	
EEG Quality		good		Total Recording Time Remaining	
				300.46 sec	

Denoising Information (EO)

Raw EEG

Denoised EEG

Flat Channels

Rejected Channels

Number of Eye and Muscle Elements				Low Artifact Percentage	
Eye	1	Muscle	0		
Total Artifact Percentage				High Artifact Percentage	
EEG Quality		good		Total Recording Time Remaining	
				266.90 sec	

Absolute Power-Eye Closed (EC)

Relative Power-Eye Closed (EC)

Absolute Power-Eye Open (EO)

Relative Power-Eye Open (EO)
