

QEEG Clinical Report BrainLens V0.4

Report Description

Personal & Clinical Data

| Name | Homaan Nik | Date of Recording | 2025-05-04 | | | | |
|---------------------|-----------------------------------|--------------------|------------|--|--|--|--|
| Date of Birth - Age | 2013-10-27 - 11.52 | Gender | Male | | | | |
| Handedness(R/L) | Right | Source of Referral | Dr Saemi | | | | |
| Initial Diagnosis | ADHD-Implusivity-Irritability-OCD | | | | | | |
| Current Medication | | - | | | | | |

Dr Saemi

Summary Report

Z-score Information

Absolute Power

Relative Power

Arousal Level

Posterior APF-EC= 09.38

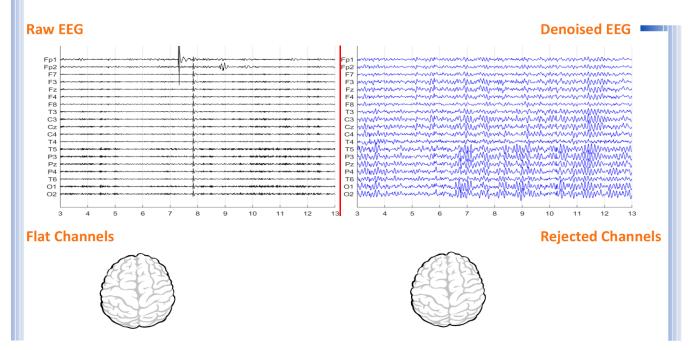

Posterior APF-EO= 09.12

To investigate QEEG-based predicting medication response, please refer to the Report.

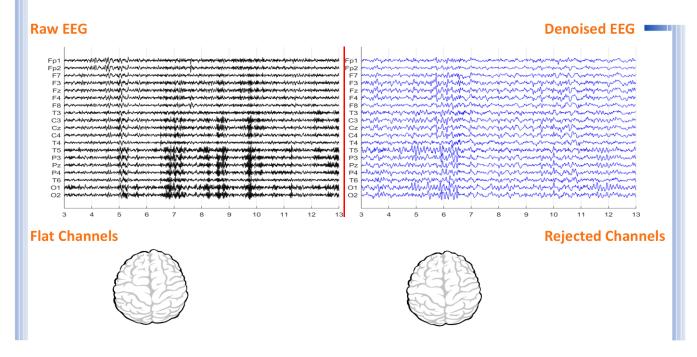

Denoising Information (EC)

| Number of Eye and Muscle Elements | | | Low Artifact Percentage | | |
|-----------------------------------|---|--------|--------------------------|--------------------------------|-----------|
| Eye | 4 | Muscle | 0 | 0 | |
| Total Artifact Percentage | | | High Artifact Percentage | | |
| | | | | | |
| EEG Quality | | bad | | Total Recording Time Remaining | 51.80 sec |

Denoising Information (EO)

| Number of Eye and Muscle Elements | | Low Artifact Percentage | | | |
|-----------------------------------|---|--------------------------|---|--------------------------------|-----------|
| Eye | 1 | Muscle | 0 | 0 | |
| Total Artifact Percentage | | High Artifact Percentage | | | |
| | | | 0 | | |
| EEG Quality | | bad | | Total Recording Time Remaining | 58.90 sec |

Pathological assessment for ADHD

Compare to ADHD Database

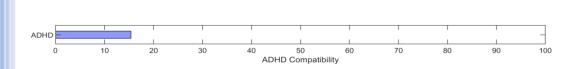

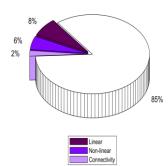

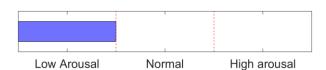

EEG Compatibility with ADHD Diagnosis

Arousal Level Detection

ADHD Clustering *

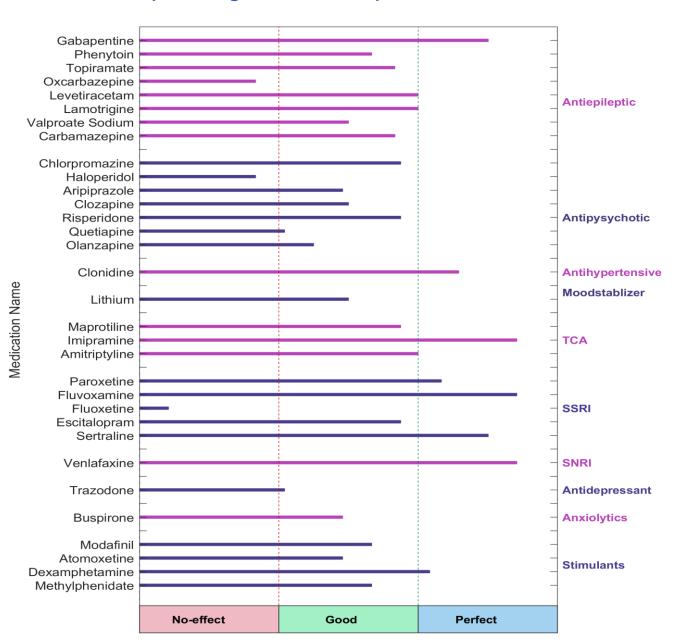

1. Same inattentive and hyperactive prevalence. Well respond to stimulants.

* If there is Paroxymal epileptic discharge in EEG data, this case needs sufficient sleep and should avoid high carbohydrate intake.
You can consider anticonvulant medications.

QEEG based predicting medication response

Explanation

Medication Recommendation

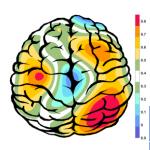

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmaco EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com.

two charts, calculate probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.

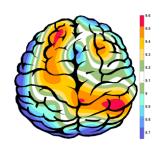

APF(EO)

Frontal APF= 09.67

Posterior APF= 09.12

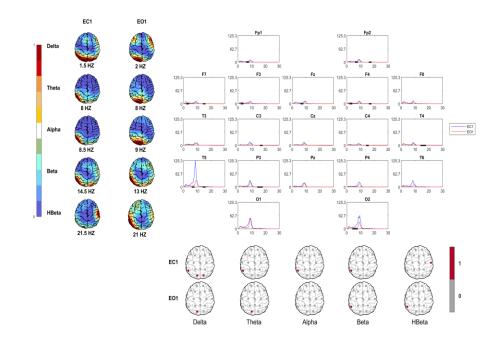

APF(EC)

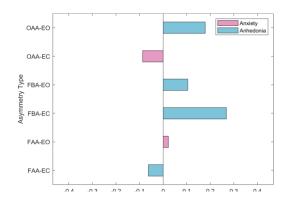

Frontal APF= 09.33

Posterior APF= 09.38
