

QEEG Clinical Report

EEGLens

The QEEG report is provided by NPCindex Company, operating under the QEEGhome brand.

Personal Data:

Name: Khadije Farajzade
Gender: Male
Age: 1946-04-22 - 79.7
Handedness: Right

Clinical Data:

Initial diagnosis: Anxiety-Depression-DM-Memory Loss-Sun Downer
Medication: -
Date of Recording: 2025-10-25
Source of Referral: Asayesh Psychiatric Clinic - Dr Torabi

This case belongs to Asayesh Psychiatric Clinic - Dr

Z Score Summary Information

Eye Open

Absolute Power

Relative Power

Generation Source

Coherence

Theta/Beta Ratio

Eye Open

Vigilance

EEG Neuromarker Values

Neuromarker	Region	Value	Assessment
APF	Frontal	10.17	Normal
APF	Occipital	09.88	Normal
Alpha Asymmetry	Frontal	00.03	Anxiety
Alpha Asymmetry	Occipital	00.22	Anxiety
Beta Asymmetry	Frontal	00.40	Anhedonia
Arousal Level	-	-	Normal
Vigilance Level	-	06.00	Normal
Vigilance Mean	-	05.78	Normal
Vigilance Regulation	-	-0.15	Normal
Vigilance 0 Stage (%)	-	88.79	High
Vigilance A1 Stage (%)	-	00.00	-

EEG Spectra

QEEG Based Predicting Medication Response

Explanation

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmac EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com .

Medication Recommendation

These two charts, calculate response probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.
