

QEEG Clinical Report BrainLens V0.4

Report Description

Personal & Clinical Data

Name	Ebrahim Khodaie	Date of Recording	12-Oct-2024					
Date of Birth - Age	07-Jul-1986 - 38.26	Gender	Male					
Handedness(R/L)	Right	Source of Referral	Dr Fallah					
Initial Diagnosis		Migraine-MS						
Current Medication	Medication Free							

Dr Fallah

Denoising Information (EC)

Number of Eye and Muscle Elements				Low Artifact Percentage				
Eye 2 Muscle 0			0					
Total Artifact Percentage				High Artifact Percentage				
0		0						
EEG Quali	ity	bad		Total Recording Time Remaining 345.99 sec				

Pathological assessment for mood disorders

Compare to Mood Disorders Database

EEG Compatibility with Depression Diagnosis

Depression Table		EC									
Feature Name	Threshold	Threshold Region									
Increased Global rAlpha	0.00	0.00 NAN									
Increased global rTheta	0.50	0.50 global									
Decreased rDelta	0.00	0.00 NAN									
Increased rBeta	0.00				N/	AΝ					
Left FAA	0.00		NAN								
Right OAA	0.13		Right OAA								
Decreased Coherence (D, 1	-0.50		Decreased Coherence (D,T)								
Increased Coherence (A, B	0.00	0 NAN									
depression 0	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	30	40 Depre	I 50 ession Comp	60 atibility	70	80	90	100		
Depression Probability											

EEG Compatibility with Anxiety Diagnosis

EEG Compatibility with Mood Swings Diagnosis *

M	ood Swings Table	EC									
	Feature Name	Threshold	Threshold Region								
D	ecreased rAlpha	-0.50	LF-RF-MF-LT-RT-C-P-O-								
Incre	ased (rDelta+rTheta)	1.00		LF-RF-MF-LT-RT-C-P-O-							
- 1	Increased rBeta	0.00	NAN								
Decre	ased Alpha Coherence	-0.50	-0.50 Decreased Alpha Coherence								
	Right FAA	0.48		Right FAA							
	BMD 0 10	20	30	40 Mood S	50 wing Compa	60 atibility	70	80	90	100	
Mood Swings Probability											

* This index can only be investigated if there are symptoms of mood swings (R/O BMD or R/O mood swings).

QEEG based predicting medication response

Explanation

── Medication Recommendation

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmaco EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com .

These two charts, calculate response probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.

rTMS Response Prediction

Network Performance

Accuracy: 92.1% Sensitivity: 89.13% Specificity: 97.47%

About Predicting rTMS Response

This index was obtained based on machine learning approaches and by examining the QEEG biomarkers of more than 470 cases treated with rTMS. The cases were diagnosed with depression (with and without comorbidity) and all were medication free. By examining more than 40 biomarkers capable of predicting response to rTMS treatment in previous studies and with data analysis, finally 10 biomarkers including bispectral and nonlinear features entered the machine learning process. The final chart can distinguish between RTMS responsive and resistant cases with 92.1% accuracy. This difference rate is much higher than the average response to treatment of 44%, in the selection of patients with clinical criteria, and is an important finding in the direction of personalized treatment for rTMS.

Alpha Asymmetry(AA)

APF(EC)

Frontal APF= 09.83

Posterior APF= 09.00

Absolute Power-Eye Closed (EC) 🀠

Relative Power-Eye Closed (EC) 🌮
