

Report Description

Personal & Clinical Data

Name	Zahra Ramezi	Date of Recording	13-Nov-2024		
Date of Birth - Age	26-Jul-2015 - 9.3	Gender	Female		
Handedness(R/L)	Right	Source of Referral	Dr Mohammadhasani		
Initial Diagnosis	ADHD				
Current Medication		-			

Dr Mohammadhasani

Summary Report

EEG Quality

Z-score Information

Compatibility with ADHD

Arousal Level

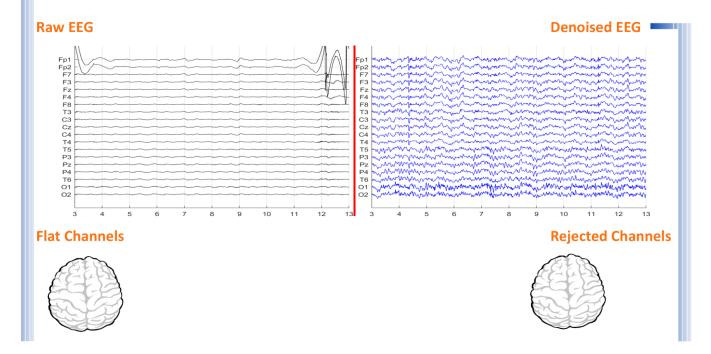

Posterior APF-EC= 09.75

To investigate QEEG-based predicting medication response, please refer to the Report.

Denoising Information (EC)

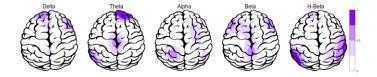

Number of Eye and Muscle Elements				Low Artifact Percentage	
Eye	3	Muscle	0	0	
Total Artifact Percentage		High Artifact Percentage			
0					
EEG Quali	ity	good		Total Recording Time Remaining 479.36 sec	

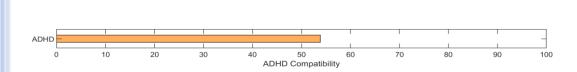

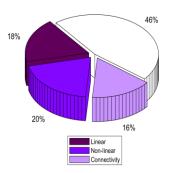

Pathological assessment for ADHD

Compare to ADHD Database

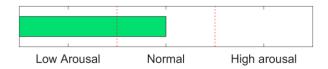

EEG Compatibility with ADHD Diagnosis

Arousal Level Detection

ADHD Clustering *

1. Same inattentive and hyperactive prevalence. Well respond to stimulants.

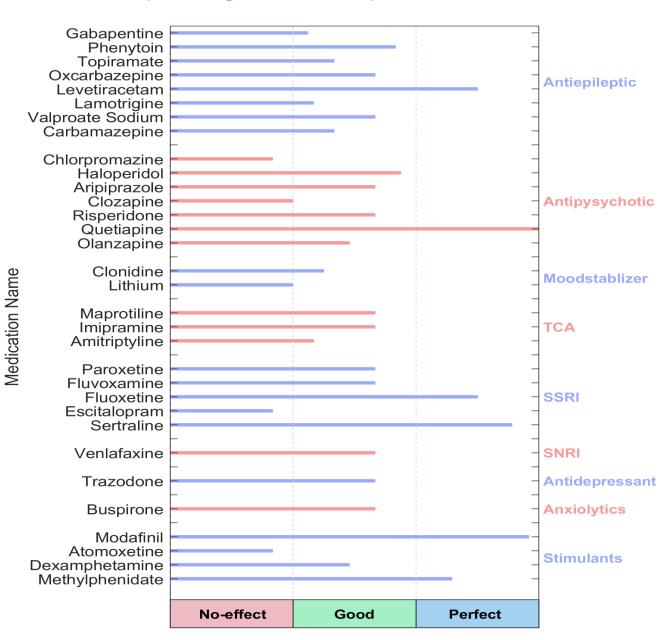

* If there is Paroxymal epileptic discharge in EEG data, this case needs sufficient sleep and should avoid high carbohydrate intake.

You can consider anticonvulant medications.

QEEG based predicting medication response

Explanation

Medication Recommendation

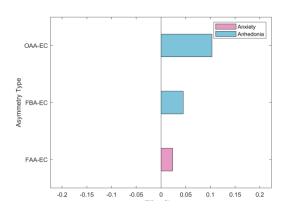

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmaco EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com.

These two charts, calculate probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.

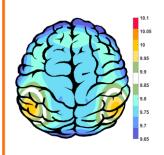

Alpha Asymmetry(AA)

APF(EC)

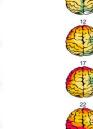

Frontal APF= 09.75

Posterior APF= 09.75

🚃 Absolute Power-Eye Closed (EC) 🥟

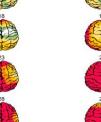

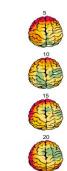

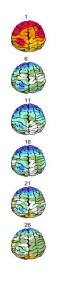

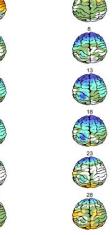

Relative Power-Eye Closed (EC) 🌮
