

# QEEG Clinical Report BrainLens V0.4

# Report Description

# Personal & Clinical Data

Name	Mohanad Sadighsharaf	Date of Recording	29-Jan-2025
Date of Birth - Age	17-Nov-2017 - 7.2	Gender	Male
Handedness(R/L)	Left	Source of Referral	Asayesh Psychiatric Clinic -
Initial Diagnosis		ADHD-Gait difficult	
Current Medication		-	

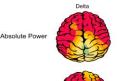

Asayesh Psychiatric Clinic -Dr Torabi

### Z Score Summary Information (EC)

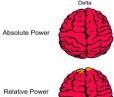

# Z Score Summary Information (EO)

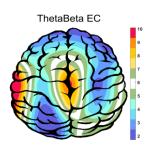

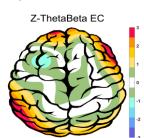

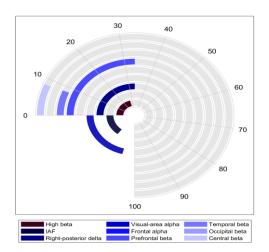

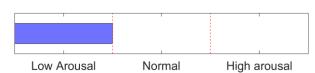

### E.C.T/B Ratio ( Raw- Z Score)

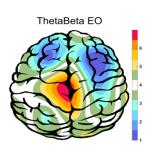

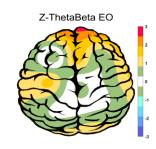

## Arousal Level

# E.O.T/B Ratio ( Raw- Z Score)

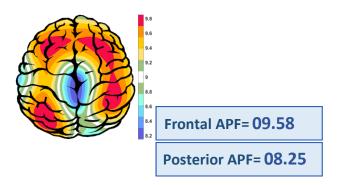

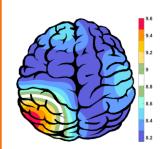

# APF(EO)

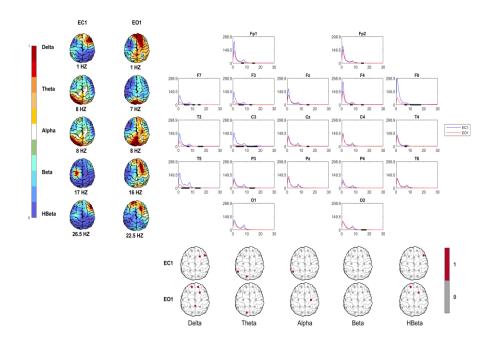

# APF(EC)

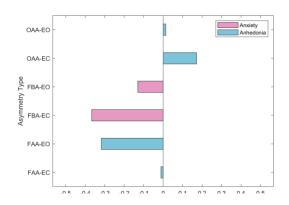

**Frontal APF= 08.25** 

Posterior APF= 08.25

### EEG Spectra

# Alpha Asymmetry(AA)

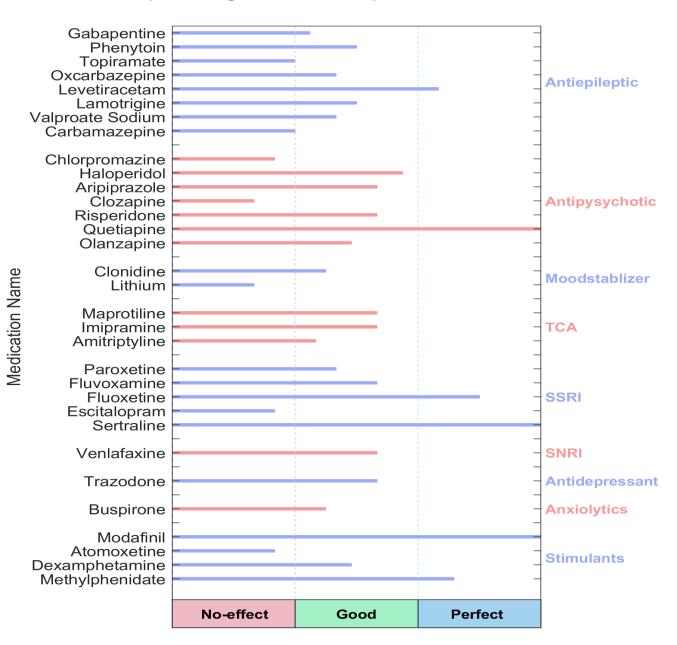

# Alpha Blocking

### QEEG based predicting medication response

### Explanation

### Medication Recommendation

These two tables can be considered the most important finding that can be extracted from QEEG. To prepare this list, the NPCIndex Article Review Team has studied, categorized, and extracted algorithms from many authoritative published articles on predict medication response and Pharmaco EEG studies. These articles are published between 1970 and 2021. The findings extracted from this set include 85 different factors in the raw band domains, spectrum, power, coherence, and loreta that have not been segregated to avoid complexity, and their results are shown in these diagrams. One can review details in NPCIndex.com.

two charts, calculate probability to various medications, according only to QEEG indicators. Blue charts favor drug response and red charts favor drug resistance. The longer the bar, the more evidence there is in the articles. Only drugs listed in the articles are listed. These tables present the indicators reviewed in the QEEG studies and are not a substitute for physician selection.

# Pathological assessment for ADHD

### **Compare to ADHD Database**

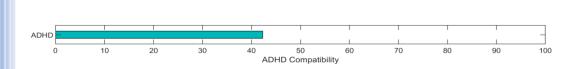

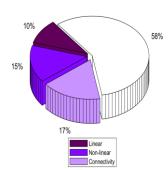

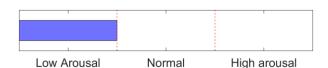

# **EEG Compatibility with ADHD Diagnosis**

### **Arousal Level Detection**

### **ADHD Clustering \***

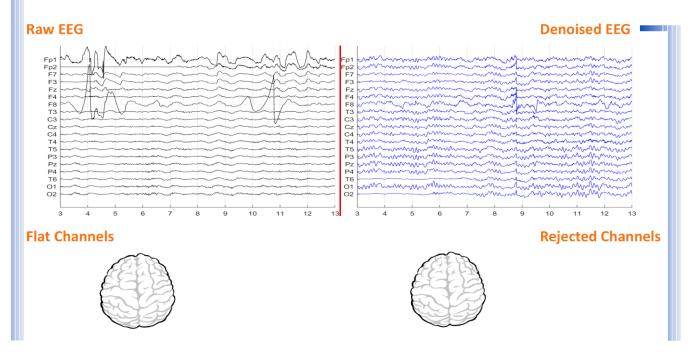

1. Same inattentive and hyperactive prevalence. Well respond to stimulants.

\* If there is Paroxymal epileptic discharge in EEG data, this case needs sufficient sleep and should avoid high carbohydrate intake.
You can consider anticonvulant medications.

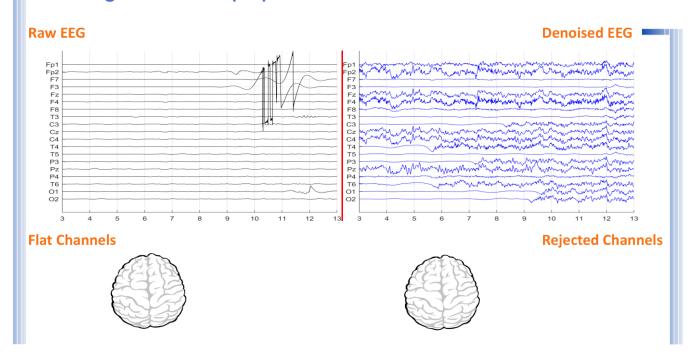

# **Denoising Information (EC)**

Number of Eye and Muscle Elements		Low Artifact Percentage			
Eye	4	Muscle	0	0	
Total Artifact Percentage			High Artifact Percentage		
0					
<b>EEG Quality</b>		bad		<b>Total Recording Time Remaining</b>	243.59 sec

# **Denoising Information (EO)**

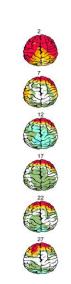

Number of Eye and Muscle Elements		Low Artifact Percentage			
Eye	3	Muscle 1		0	
Total Artifact Percentage		High Artifact Percentage			
0		0			
<b>EEG Quality</b>		bad		<b>Total Recording Time Remaining</b> 258.80 sec
