

Report Description

Personal & Clinical Data

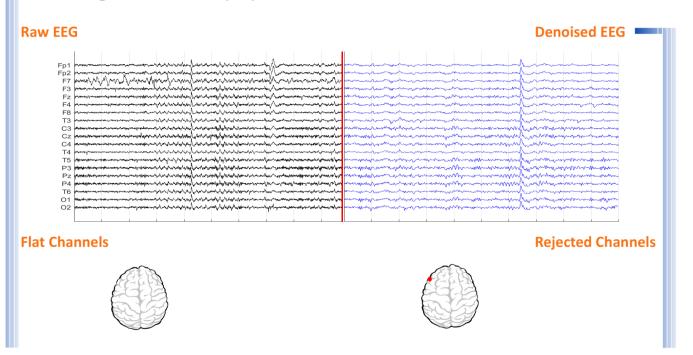

Name	Leila Kashani	Date of Recording	20-Aug-2024	
Date of Birth - Age	23-Mar-1962 - 62.41	Gender	Female	
Handedness(R/L)	Right	Source of Referral	Movasatschool	
Initial Diagnosis	Depression-tumor			
Current Medication	Hydroxyurea			

Movasatschool

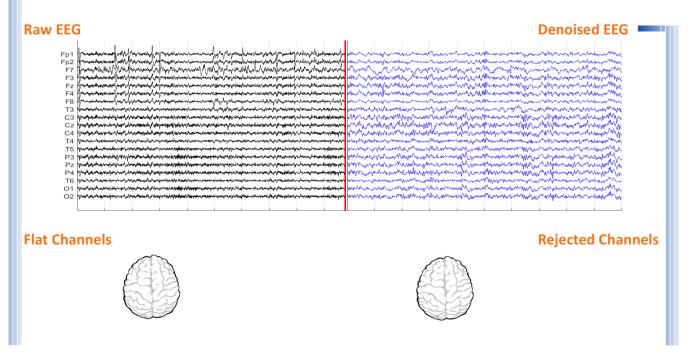

Denoising Information (EC)

Number of Eye and Muscle Elements			Low Artifact Percentage		
Eye 1 Muscle 0			0		
Total Artifact Percentage			High Artifact Percentage		
0			(0)		
EEG Quality		good		Total Recording Time Remaining	278.19 sec

Denoising Information (EO)

Number of Eye and Muscle Elements		Low Artifact Percentage		
Eye 2 Muscle 0		0		
Total Artifact Percentage		High Artifact Percentage		
0		0		
EEG Quality good		Total Recording Time Remaining 252.67 sec		

Pathological assessment for mood disorders

About Predicting rTMS Response

This index was obtained based on machine learning approaches and by examining the QEEG biomarkers of more than 470 cases treated with rTMS. The cases were diagnosed with depression (with and without comorbidity) and all were medication free. By examining more than 40 biomarkers capable of predicting response to rTMS treatment in previous studies and with data analysis, finally 10 biomarkers including bispectral and nonlinear features entered the machine learning process. The final chart can distinguish between RTMS responsive and resistant cases with 92.1% accuracy. This difference rate is much higher than the average response to treatment of 44%, in the selection of patients with clinical criteria, and is an important finding in the direction of personalized treatment for rTMS.

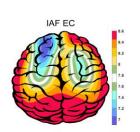

APF(EO)

Frontal APF= 07.75

Posterior APF= 08.08
